US History -- Chapter 15-1: The Stock Market Crash Part 2

Mr. Levendusky

The Great Depression vs. The Great Recession!!

Your Task:

Compare and Contrast the Great Depression of the 1920s- 30s, to the "Great Recession" that we have experienced in the 2000's to present day.

Method:

In order to make the connections, you will have to do some investigative work to find out details and evidence to support your argument. Look for similar warning signs (things leading up to the depression/ recession), data/evidence, etc.

Product:

PRINT out your evidence that you have discovered online from a **reputable source**, and then make a list of similarities and differences (brainstorm). Using the evidence and the list of differences, write a one program (5-7) sentences response, typed, explaining whether or not you think that there were/are connections between the Great Depression and the 'Great Recession'.

Brainstorming:

Great Depression	"Great Recession"
